Invitation to Present Technical Seminars

Since 1982, contributions from industry have sponsored the Examiner Education Program, which provides examiners with first hand knowledge on the creation and development of new technology. Support for this program has not kept pace with the growth in the number of patent examiners over the past decade. In an effort to supplement the existing program, and to provide examiners with current knowledge in the fields of technology in which they specialize, the Office is seeking the assistance of individuals and organizations that could present technical seminars on location at the Office.

Seminars would typically be of two hours duration, and provide examiners with information on current technical developments and issues in the technical fields of interest. The Office can provide classroom space, audio/visual equipment, copying services and a nominal fee to cover expenses. The Office will not provide travel expenses to or lodging expenses associated with the presentation of a seminar at the Office.

The Office is particularly interested in having seminars presented in the following technology areas:

Advanced Computer Architecture
Heat Resistant Materials
Artificial Intelligence, Neural Networks & Fuzzy Logic
Biotechnology
Imaging Technologies & Computer Graphics
Medical Devices & Diagnostics
Semiconductors
Superconductors
High-density Data Storage
High-performance Computing Optoelectronics
Sensor Technology
Computer Communication Networks
Massively Parallel Processing Systems (MPP)
Reduced Instruction Set (RISC) Computers
Database Management Systems
Audio Processing Systems
Object Oriented Programming
Trends in Software Development
Compilers
Integrated Dissimilar Computer Systems
Recent Developments in Computer Emulation & Simulation
Agrochemicals
Polymer Technologies
Pharmaceuticals
Liquid Crystals
Nanostructured Matter
Membrane Technology
High Definition TV
Telecommunications
Conductive Compositions

Other suggestions for technology areas of interest are cordially invited.

Individuals and organizations that are interested in participating in this effort to keep examiners up to date in their knowledge of current technology are requested to contact Bernardette Sanders by mail addressed to:

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
